

Ordering the ADU

Licensing of the ADU gives the purchaser a license to use the software on a specified number of computer systems. The computer systems must meet one of the following criterion:

- It is owned by the purchaser.
- It is leased by the purchaser for its exclusive use.
- The computer is located on the premise of the purchaser and is a part of your business. (This allows ASPs.)

The purchaser can freely transfer the license to another computer system (by removing it from the first system and installing it on another).

The license purchaser receives one registration code for a single legal entity. This code will work with all copies of the product.

The pricing is NOT per-computer, but rather for a "pack" of licenses. (Purchase of a "10-pack" means you have a license for up to 10 computer systems.)

Payment Options

Check or Money Order:

There is a 5% discount for orders that are accompanied by a check or money order. **MONEY ORDERS OR CHECKS MUST BE IN U.S. FUNDS DRAWN ON A U.S. BANK.** The requirement that it must be drawn on a U.S. bank often causes confusion, but in practice is not as hard as it sounds. The main point is that the check that is sent must be able to be processed by a U.S. bank without manual intervention. Check with your normal bank, it is quite common for banks to have "sister" banks in other countries that can issue checks in the appropriate manner. Some credit card companies can issue appropriate checks charged against your credit card. Many countries have International Postal Orders that work fine. American Express can also issue appropriate checks. We apologize for the inconvenience, but if the check sent should require manual processing, fees in excess of \$20 can result.
